December 5 and 6, 2017

8:00 a.m. to 5:00 p.m.
both days

K9 HANDLER/FIRST RESPONDER ADVANCED SCOPE 2-DAY TRAINING

Expert instructors from K9 MEDIC™ deliver an advanced scope and hands-on training format. SynDaver Labs' synthetic surgical canines enhance skill stations.

K9 Handler / First Responder Advanced Scope

“Advanced Scope” is for those handlers and first responders who will face environments that require additional medical support. Learn subcutaneous fluid administration, a simple skill that can help prevent heat injuries, a leading cause of death in working K9s; needle decompressions of the chest to treat tension pneumothorax and needle decompressions of the stomach to treat GDV/bloat, and; IV fluid administration.

eXPERIENTIAL Format

A more comprehensive hands-on and scenario-based experience, along with benefits of a diversified instructor cadre. In addition to the all-class practice exercises, this format delivers an additional four rotations of hands-on skills stations and solo/team scenarios. And with a ratio of 8:1, each student is sure to receive significant instructor feedback and attention customized to their specific needs. Finally, the increased ratio means that the instructor cadre for this format can be very diversified, often including a lead expert veterinarian, experienced tactical paramedic and field-savvy K9 Handler.

COST: This training is paid for by SART. Students will be responsible for their travel, lodging and per diem expenses.

CERTIFICATION: Upon completion, students receive a K9 MEDIC™ Certificate of Completion and Continuing Education Credit for law enforcement and for EMS providers.

REGISTRATION: This training is by invitation only. If you register for this training, but your name is not on the invitation list, then you will be added to the wait list and will not be provided a spot in this class unless contacted directly by the training organizer.

CONTACT: LeiAnna Tucker, Statewide Coordinator for SART, (850) 410-0920.
