

Agroterrorism Threats

2019 SART Planning Conference

May 30, 2019

FFAA Mission:

Promote responsible use of
fertilizers/pesticides in Florida

Agroterrorism Threats

Domestic and International

Goals:

- Protect products during transportation, storage and distribution; and,
- Increase customer awareness of the potential for criminal misuse of the product.

Agroterrorism Threats: Industry Actions

Be Aware for America

Be Secure for America

Watch for unusual or suspicious behavior by anyone who:

- Seems unfamiliar with details of using pesticides and/or fertilizers.
- Acts nervous, seems uneasy or vague, and avoids eye contact.
- Asks for material in smaller, individual containers rather than in bulk.
- Is insistent on certain materials and wants to pay in cash.

ResponsibleAg Certification Program

ResponsibleAg offers a robust suite of tools and resources built to inform members.

Industry-Led Initiative

Members include thousands of businesses handling fertilizer, crop protection products and other farm inputs.

Promotes Safe Practices

Safeguards employees, emergency responders and our communities.

Compliance Made Easier

There are hundreds of regulations from OSHA, DOT, EPA and DHS that agribusinesses must follow. ResponsibleAg can help!

Proactive Initiative

Helps members identify potential compliance issues and correct them proactively.

Comprehensive in Scope

Audits are built upon a comprehensive checklist of more than 400 questions covering 17 areas of a facility.

Educational Process

Facility audits are a tremendous teaching opportunity. Auditors help the personnel learn and gain a better understanding of the regulations.

Promotes Continuous Improvement

Systematic approach for continuous improvement drives safety and employee morale.

Milestones: May 21, 2019
